

We need an animated logo for dribbble and a blog post, that we'll publish on designmodo.com.

Here are the key points:

- 800x600 pixels
- 30 or 60 FPS
- Looped 5-8 sec
- The result should be presented as **GIF**(preferred) if the author can provide lossless gif below 8MB
OR lossless video.

The idea to show limitless creativity and power behind the new brand. Animation should reveal three variations of the logo:

- (dm) in circle —short version of the logo
- designmodo — full logo
- smiley one — to show our fun side ;)

Here are some examples for the inspiration:

<https://dribbble.com/shots/1497998-Designers-MX-Logo-Animated>

<https://cl.ly/ls48> (I like how colors are splitting here on movement)

We would appreciate the touch of the creativity from the animator. I like to see the fluent motion of the paint, gravity, physics, and third dimension.

You can use following brand colors:

- Primary: #3260B1;
- Primary Soft: #ECEFF3;
- Green: #21b382;
- Blue: #186bff;
- Yellow: #fcd856;
- Gold: #c59b00;
- Red: #db4433;
- Black-ish: #292f38
- Pure white: #ffffff;

Please note: it's not necessary use all of them at once.

We have a source vector file of a logo that we'll share with the chosen candidate.

Please note, that a project is considered to be confidential until we release the new version of our website (mid-September 2017) and we want to have a final version of this animation by the end of August 2017.

In addition, we'll tag the author's portfolio in the article (500k viewers a month) and the official designmodo dribbble page, which potentially could bring you some valuable attention.

Please send your budget and time estimation to hi@dmitrykotov.com
